

Corrigendum/update to the PGP 2020-22 Admission policy released on 24.10.2019

In view of COVID 19 and conforming to the government directive to avoid large gatherings, **all the remaining interviews for IIM Shillong PGP 2020 - 22 batch will be held online**. Accordingly, the PGP admission policy 2020 -22 is partially revised. Phase 2 of the original admission policy is revised as follows:

Phase 2: Merit Listing for Admission Offer to PGP 2020-22 Batch (Revised)

After the Admission process, the scores of PI will be used along with overall CAT performance of the candidates for preparation of the final merit list. Offer for admissions will be made based on this merit list. The scores used will thus be

Y: Score in PI

Z: Overall CAT Absolute Score

which will further be normalized as N^y and N^z for preparation of the final merit list. This process is illustrated below.

With a total of m number of candidates will appearing in the PI process, an overall score, OS^c for every appearing candidate c , will be calculated using the following formula, which will be used for preparing the merit list:

$$OS^c = w_1(N_c^y) + w_2(N_c^z) \quad \forall \quad c = 1, 2, 3, \dots, m \text{ where,}$$

N_c^y : Normalized score of Performance of the candidate c in PI

N_c^z : Normalized score of Performance of the candidate c in CAT-2019 Absolute Score (overall)

w_1 : Weight of performance of the candidate c in N_c^y (60%)

w_2 : Weight of performance of the candidate c in N_c^z (40%)

However, there will be cut-off scores for candidate's performance in PI in various categories as shown in Table 5.

Table 5: Cut-off on the Performances of Candidates in PI for Merit list for Admission Offer

Categories	Cut-off as Minimum Percentage of Performance out of Maximum Possible Performance in PI
DA	20.0%
ST	20.0%
SC	25.0%
OTHERS (OT) including EWS	30.0%

The candidates will be ranked based on the decreasing order of the OS^c scores. The admission offers will be made to the candidates in order of their rank based on the OS^c scores.
