ABOUT IDEA/VENTURE

BharatIoT is a technology-driven company committed to democratizing IoT innovation in India. Its mission is to digitize the physical world –enabling real-time monitoring, data-driven decisions, automation, and operational efficiency–through scalable, affordable, and locally relevant IoT solutions. It empowers individuals, researchers, MSMEs, and YOU to transform everyday challenges into opportunities for smarter, more sustainable growth.

PROFESSIONAL EXPERIENCE

He is an experienced full-stack technologist specializing in affordable, reliable IoT and electronics solutions for diverse Indian sectors. His expertise spans embedded hardware to cloud platforms with a focus on region specific R&D and accessibility, particularly for underserved areas like the Northeast.

Sanjay Singh

Sanjay Singh is the founder of BharatIoT, building affordable and reliable IoT and electronics solutions for individuals, startups, and industries across India. Experienced across the full stack—from embedded hardware (ESP32, LoRa, GSM, RS485) to cloud platforms (Firebase, Node.js, MongoDB). Passionate about in-house R&D, real-time solutions, and region-specific customization, especially for underserved areas like the Northeast. Focused on making advanced technology accessible, practical, and impactful.
