EDUCATION

Bachelor of Technology in Electronic and communication Engineer

ABOUT IDEA/VENTURE

Doctigo is a GENAI-based healthcare operating system designed to improve clinical efficiency and patient safety. It enables real-time monitoring,automates manual clinical workflows and predict diseases,emergencies & early signs of risk through predictive and quantum analytics and edge-level intelligence(for offline enablation of system in local sensors). The platform is designed to work across diverse healthcare settings–doctors,small clinics, mid-sized hospitals, and resource-constrained environments–making advanced decision support accessible and reliable for all.

PROFESSIONAL EXPERIENCE

He brings 3 years of experience in operations and data analytics, enabling him to design practical, efficient, and insight-driven healthcare technology solutions.

Abhishek Dutta

Abhishek Dutta is the founder of VentureBoost Technologies Private Limited (Doctigo), an engineer and early-stage entrepreneur dedicated to advancing healthcare through AI-driven operating systems. With a strong background in electronics and data analytics, he focuses on building technologies that address real operational gaps within the healthcare ecosystem. Through Doctigo, he aims to deliver predictive, reliable, and resource-efficient digital healthcare solutions tailored for the Northeast region, as well as other Tier-2/3 cities and rural areas–making quality healthcare more accessible, scalable, and impactful.
